Test	Value	Unit	Bio. Reference Range
------	-------	------	----------------------

## Glycosylated Haemoglobin (HbA1c)

HbA1C	6.8	%	
Eag	148.46	mg/dl	

(Method : FIA, Whole Blood)

**Normal Range -**

GOOD CONTROL : 6.4- 7.0

FAIR CONTROL : 7.0- 8.0

ACTION SUGGESTED : > 8.0

**\*INTERPRETATION :**

1. Glycosylated hemoglobin (HbA1c) test is done to assess compliance with therapeutic regimen in diabetic patients.
2. A three monthly monitoring is recommended in clinical management of diabetes.
3. It is not affected by daily glucose fluctuations, exercise and recent food intake.
4. The HbA1c is linearly related to the average blood sugar over the past 1-3 months (but is heavily weighted to the past 2-4 weeks).
5. The HbA1c is strongly associated with the risk of development and progression of microvascular and nerve complications.

(Test has been done on SD Biosensor F200)
